Demountable Suite

Fully demountable, this suite exudes innovation and practicality. The demountable concept allows future alterations and extensions to be performed simply and cost effectively with the minimum amount of disturbance to occupants.

The suites reusability supports the Environmental requirement to maximise resources and minimise wastage.

A swift installation time is assured due to the modular type construction, while the pre-finished panels and aluminium reduce the number of trades required on site, minimising dust and disturbance.

Demountable 44

Atmosphere and environment.

The 44mm suite ensures a crisp and streamlined finish providing space saving opportunities. With its range of design options, the Demountable System provides the designer with the option of creating a variety of outcomes, whilst maintaining a clean streamlined appearance. Each module can be connected together with a variety of configurations, each providing their own distinct appearance and adding to the corporate image of the suite.

Features of the Demountable 44

- Prefabricated modular system;
- Reusable and relocatable;
- Minimise trades on site;
- Tax write off advantages (refer to your accountant for more information);
- Streamlined 44mm walls;
- Ease of installation;
- Functional and adaptable; and
- Space savings through minimum wall thickness.

Demountable 70

Atmosphere and environment.

The 70mm suite is similar in concept to the 44mm suite, but offers a more robust and sturdy construction with its extra wall thickness. Connections between the modules provide a consistent shadow line which enhances its corporate appearance. While the aluminium service posts allow

for the distribution of power and voice/data cables, sound proofing can be achieved by the use of acoustic insulation to the core of the panel, inserted during the manufacturing stage.

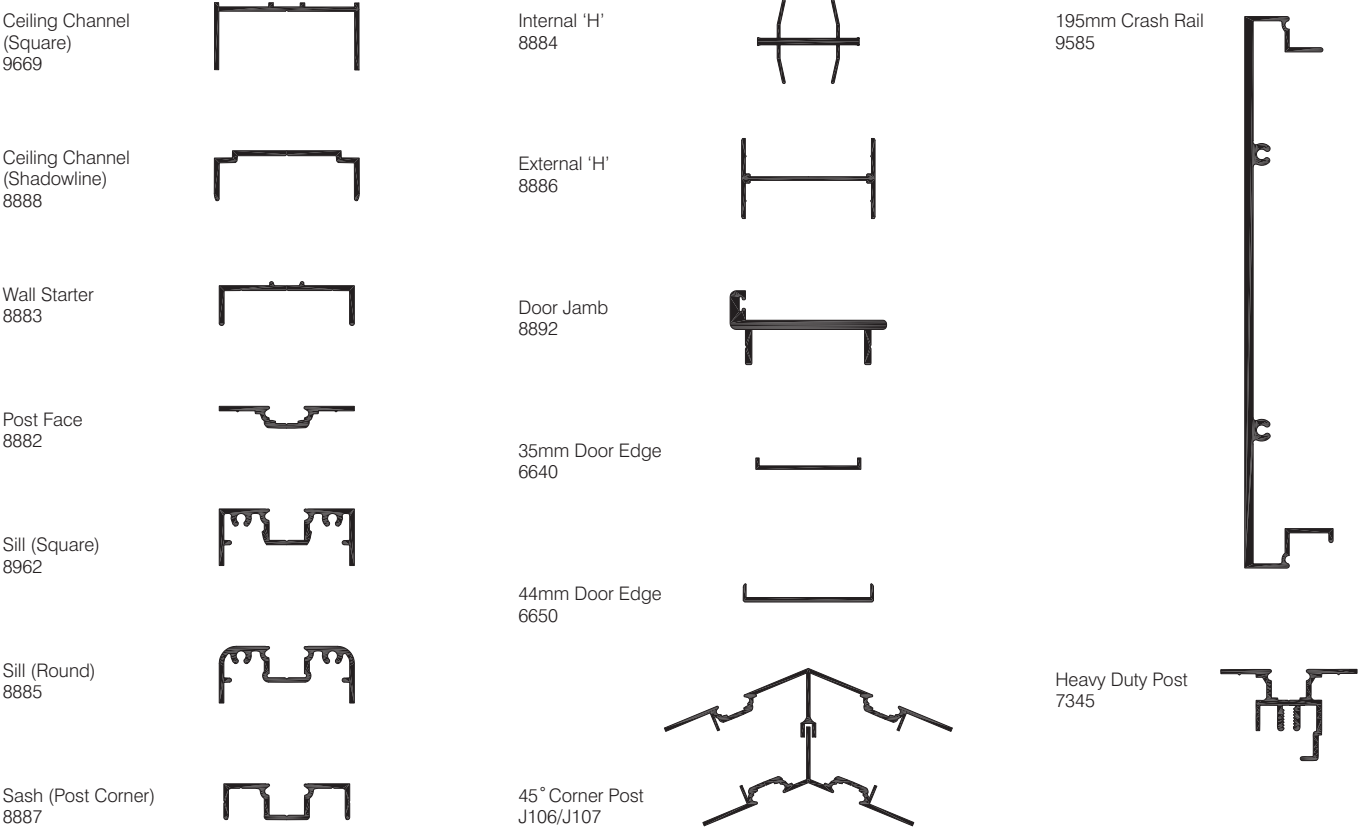

Features of the Demountable 70

- Prefabricated modular system;
- Reusable and relocatable;
- Ease of installation;
- Minimise trades on site;
- Tax write off advantages (refer to your accountant for more information);
- Robust Construction;
- Acoustic Properties; and
- Clean shadow lines to connections.
